

LITEPAPER · V1.0 · AUGUST 2026

\$NIKAQUANT

The payment layer of the NikaQuant universe.

One coin connecting a live trading ecosystem: MT5 analytics,
Expert Advisors, signals and community — on Solana.

CA: ChNfRcg2FkAERoQYxsvbx2ZBXW6tp3Yxsu4kQzJpump

Most coins promise a product. This one already ships.

NikaQuant is a live, revenue-generating trading ecosystem — built, shipped and operated long before the coin existed. \$NIKAQUANT was not launched to find a purpose; it was launched to connect one.

PRODUCT / 01

LIVE

MT5 Strategy Analyzer

app.nikaquant.com — 120+ tools across six workspaces: backtest analysis, Monte Carlo & robustness testing, trade journaling, live account bridge, prop-firm tracking and an AI trading coach.

PRODUCT / 02

LIVE

Expert Advisors & Indicators

A catalog of MQL5 Expert Advisors and indicators engineered through a professional pipeline — audited, versioned, and distributed via the MQL5 Market and nikaquant.com.

PRODUCT / 03

LIVE

Signals, Arena & Tools

Signal services, trade-audit tooling, community leaderboards and the Arena — a full stack of trader-facing products under one brand, one design system, one roadmap.

Today these products are paid in fiat. The thesis of \$NIKAQUANT is simple: **route this economy through one coin.**

A coin backed by an ecosystem, not just a chart.

BUY / 01

Real utility target

The roadmap wires \$NIKAQUANT into the NikaQuant payment flow: subscriptions, EAs and premium tools payable in coin — at a discount versus fiat. That converts product demand into coin demand.

BUY / 02

Fair launch DNA

Launched on pump.fun's public bonding curve. No presale. No VC allocations. No team unlock cliffs. Every participant entered through the same curve — verifiable on-chain by anyone.

BUY / 03

Hard-capped & immutable

1,000,000,000 supply, forever. Mint authority revoked — no one can ever print more. Freeze authority revoked — no one can ever lock holder tokens. The contract cannot be inflated or weaponized.

BUY / 04

An operator, not a ghost

The ecosystem behind the coin ships continuously — a public web platform, product changelogs, versioned EA releases. The coin inherits the credibility of software you can use today.

BUY / 05

Asymmetric entry point

The coin is at day one of its story while the ecosystem is years into its own. Early bonding-curve entries carry the highest risk — and sit earliest in the utility roadmap.

Holding is **membership.**

The roadmap turns wallets into keys. As the ecosystem grows, the same bag opens more doors.

HOLD / 01

ROADMAP

Holder tiers & perks

Tiered access planned by holdings: discounts on Pro/Premium subscriptions, early access to new EAs and features, exclusive Arena flair and leaderboard perks — unlocked by holding, not by paying twice.

HOLD / 02

ROADMAP

Governance voice

Planned holder voting on product direction: which EA ships next, which features get prioritized, where the ecosystem expands. Skin in the game becomes a say in the game.

HOLD / 03

ROADMAP

Buyback alignment

Planned revenue-share buybacks route a slice of ecosystem cash flow back into the market — aligning holders with every subscription and every EA sold.

HOLD / 04

LIVE

Scarcity you can verify

Fixed supply with revoked mint authority means a holder's share of the network can never be diluted by new issuance. What you hold is what you own.

Designed so liquidity compounds.

1

Products earn revenue

Subscriptions, EAs and tools generate real cash flow — the engine that already runs today.

2

Revenue share buys \$NIKAQUANT

Roadmap: a defined slice of ecosystem revenue executes market buybacks — recurring, programmatic demand independent of hype cycles.

3

Utility locks supply

Coins used for payments, tiers and perks are coins held, not dumped — circulating float tightens as adoption grows.

4

Deeper liquidity attracts more users

Curve graduation seeds the DEX pool; buybacks and volume deepen it. Deeper books attract bigger participants — and the wheel turns again.

Simple. Fixed. Verifiable.

1B FIXED SUPPLY	0% PRESALE / VC	0 MINT AUTHORITY	100% PUBLIC CURVE LAUNCH
---------------------------	---------------------------	----------------------------	------------------------------------

Network	Solana (Token-2022)
Contract address	ChNfRcg2FkAERoQYxsvbx2ZBXW6tp3Yxsu4kQzJpump
Total supply	1,000,000,000 — hard-capped
Mint authority	Revoked — supply can never increase
Freeze authority	Revoked — tokens can never be frozen
Launch	pump.fun public bonding curve — no presale, no private allocations
Liquidity path	Bonding curve → automatic DEX pool at graduation

From launch to payment layer.

PHASE 1 · NOW

Ignition

Fair launch on pump.fun ✓

Risk disclosure — read before buying.

\$NIKAQUANT is a highly speculative digital asset. Cryptocurrency prices are extremely volatile and you can lose your entire investment. All roadmap items in this document — including payments integration, buybacks, holder tiers and governance — are planned features, not live functionality; they may change, be delayed, or never ship. Nothing in this document is financial, investment, legal or tax advice, and no returns, price appreciation or liquidity levels are promised or guaranteed. Tokens launched on bonding-curve platforms carry additional risks including very low liquidity, high slippage and extreme volatility. Holding \$NIKAQUANT confers no equity, ownership, revenue rights or claim on NikaQuant, its products or its operators. Do your own research and never invest money you cannot afford to lose. See nikaquant.com/risk-disclosure.
